WC Docket No. 05-196 — Compliance Letter

Dear Sir or Madame:

This Compliance Letter is on behalf of IP Retail, Inc. (the “Company”), who will qualify as an “interconnected VoIP service provider” under 47. C.F.R. §9.3, as adopted by the Federal Communications Commission (the “Commission”) in its VoIP 911 Order, released by the Commission on June 3, 2005 (the “VoIP Rules”).

1. Company Information:

The Company is a newly formed Florida corporation with its principal address at:

IP Retail, Inc.
102 NE 2nd Street, No: 381
Boca Raton, FL 33432

The Primary Contact person for the Company is:

E911 Network Administrator
IP Retail, Inc.
102 NE 2nd Street, No: 381
Boca Raton, FL 33432
Telephone: 561-395-5507
Facsimile: 561-423-9283
Email: martin@w3m.com

With a copy to:

Gregory St. John
Adorno & Yoss LLP
700 South Federal Highway
Suite 200
Boca Raton, FL 33432
Telephone: 561-620-5599
Facsimile: 305-503-9690
Email: gsj@adorno.com

2. Company Background:

The Company was incorporated on October 14, 2005 and is in the process of acquiring and developing systems that will allow it to provide Interconnected VoIP Services to its customers or subscribers in the near future.

As of the date of this Compliance Letter, the Company (1) has not solicited subscribers; (2) has not entered into any agreement with any subscriber to provide Interconnected VoIP Services; and, (3) the Company has not provided any Interconnected VoIP Service to any subscriber.

Although the Company intends to have the capacity to provide Interconnected VoIP Service on or about January 25, 2006 and the Company intends to commence solicitation of subscribers on February 1, 2006, it is possible that those dates will be delayed to an indeterminate date, as will be determined by the Company.

3. 911 Solution Outsourced to Telefinity/Intrado:

In order to comply with the VoIP Rules, the Company has entered into that certain Agreement for E911, Hosted Switch and Wholesale VoIP Services (the "Agreement") with Telefinity Corporation ("Telefinity"), dated December 5, 2005. All of the Company's subscribers will be covered by the Agreement. The Company has based this Compliance Letter on a model letter included in an "FCC Reporting Packet" (November 22, 2005) provided by Telefinity. The Company has modified the model letter to apply to the Company.

4. 911 Solution:

The V9-1-1™ solution enabled by Telefinity Dash911 through Intrado provides a true E9-1-1 solution for VoIP Service Providers. The solution provided by the Telefinity Dash911 affiliation with Intrado enables a comprehensive approach to delivering E9-1-1 for VoIP by handling all aspects of the VoIP 9-1-1 call delivery and VoIP Positioning Center (VPC) functionality such as Master Street Address Guide (MSAG) Address Validation, ESQK management, Geocoding, real-time provisioning and routing determination. Included in the Service for the VSP is also the call delivery component to ensure the 9-1-1 call reaches the appropriate selective router and Public Safety Answering Point (PSAP). Specifically, Intrado manages the VPC functionality and the Call Delivery component on behalf of Telefinity Dash

911 thereby enabling VSPs to take advantage of a full end-to-end solution from one E911 service provider.

The only VSP requirements for delivery of the V9-1-1 service are the ongoing delivery of address and telephone number information to Telefinity Dash911 via a real-time interface and the PSTN connectivity to the Telefinity Dash911 network to enable live 9-1-1 call delivery. The real-time interface is via a SOAP API programming interface supplied by Telefinity Dash 911 to its VSP customers, or, a branded website interface provided by Telefinity Dash911 to its VSP customers.

5. 911 Routing Information/Connectivity to Wireline E911 Network:

Currently through the assistance of our Network providers, each of Telefinity Dash911's VSP customers will have access to 154 E9-1-1 Selective Routers by November 28th, 2005 and the attached "Major Market Deployment Map" and the "VoIP Deployment Plan" reflects the major market deployment schedules. Note: the market deployment map represent major markets where Intrado has reported to Telefinity Dash911 that it has connectivity to at least 1 selective router, ALI steering and the ability to populate ALI.

6. Transmission of ANI and Registered Location Information:

- **Basic PSAP:** Currently 93% of the US population is served by PSAPs operating off an E9-1-1 Selective Router. To illustrate PSAPs within the US, which are not served by a Selective Router, the enclosed "Basic 9-1-1 PSAP" map could be used as reference information. While these areas are not included within the FCC Order and are not required for compliance, Intrado reports that they are actively contacting these areas to determine technical options for VoIP E9-1-1 native call delivery.
- **ANI Only:** There are unique deployment circumstances in areas of the US and Puerto Rico that operate off E9-1-1 Selective Routers, but will not meet the full FCC mandate. Telefinity Dash911 has indicated that Intrado has noted that there are currently four (4) States and a Territory that will have native Selective Routing functionality but will only provide Automatic Number Identification (ANI) only service to the PSAP. The following information explains the circumstances within these areas:

New Jersey - In the State of New Jersey Intrado has obtained permission from the State to deploy a voice-only service which includes the call-taker receiving ANI on the VoIP 911 caller. The State ALI system is not capable of full dynamic ALI updates and will require an upgrade. New Jersey represents 3% of the total US population.

Ohio - To date, Ohio has not granted permission to Intrado to deploy a voice-only solution. The State ALI system is not capable of full dynamic ALI update. Ohio represents 4% of the total US population.

Hawaii - To date, Hawaii has not granted Intrado permission to deploy a voice-only solution. The ALI systems serving Hawaii are not capable of full dynamic ALI update. Hawaii represents 5% of the total US population

Puerto Rico - To date, Puerto Rico has not granted permission to Intrado to deploy a voice-only solution. The ALI systems are not capable of full dynamic ALI update. Puerto Rico represents 3% of the total US population

7. VSP Specific Metrics: Please see enclosed VSP coverage Spreadsheet.
8. 911 Coverage:

The Company is relying on Telefinity to provide E911 coverage for all of the Company's subscribers, which is as follows:

- *Deployment Overview.* The Telefinity Dash 911 E911 solution uses Intrado as a backbone supplier and as such Intrado is the VPC and is working on nationwide native VoIP E9-1-1 delivery in accordance with the Commission Order. The initial PSAP deployments are targeted in major metropolitan areas throughout the US based on the VSP customer subscriber base priorities. The attached "*Major Market Deployment Map*", which corresponds with MSAs, identifies regions within our subscriber territory that have connectivity to at least one Selective Router, ALI steering capabilities; ANI and the ability to populate ALI. Telefinity Dash 911 has advised us that these areas are planned for deployments by November 28, 2005; March 31, 2006 and June 30, 2006. This intention of this map is to demonstrate FCC compliance for the November 28th requirements and the future deployment strategy.

9. Obtaining Initial Registered Location Information:

Upon each subscriber's subscription to the service and prior to installation of the service, the subscriber is required to provide the physical location at which the service will first be utilized. This requirement will apply to all subscribers and the subscribers cannot complete the sign-up process or acquire access to the service without providing this information. Since the Company has no subscribers as of the date of this Compliance Letter, the Company has not contacted any subscribers with respect to Registered Location Information.

10. Obtaining Updated Registered Location Information:

Telefinity Dash 911, as part of our total 9-1-1 solution, provides at least one way of updating each subscriber's Registered Location. As a component of the Telefinity Dash911 Service we have access to a near real-time address update system provided to us by Telefinity Dash911. This allows us to have near real-time delivery of the subscriber's address and also allows us as a VSP to submit a subscriber's address update information directly. The system allows us to have the subscriber input his initial address into the system at the time of initially signing up for our VoIP service. Addresses submitted are subjected to an immediate screening against the US Postal Service Street Address Guide in order to immediately determine if the submitted address is a valid address. VSPs may integrate VUI into their existing provisioning systems to ensure seamless delivery of acquired registered location information to the Intrado systems.

Subscribers have more than one option to input, update or change their address. Subscribers can easily and quickly update their Registered Location by either (a) online via our website, or (b) use the Telefinity Dash911 telephone touch tone (IVR) system to either select another pre-registered address that the subscriber may already have on file, or to ask for an operator who will make the address change while the customer is on the phone.

At the time of an emergency VoIP 9-1-1 call, Telefinity Dash 911 passes the call directly to Intrado's call routing system. Intrado's call routing system uses the customer's provisioned information to associate the latitude and longitude assigned during provisioning with the wireline PSAP boundaries maintained by Intrado to determine appropriate PSAP for delivery of the MSAG Valid Address and Call Back Number of the user.

Telefinity Dash 911 also offers to us, as a VSP a newly-released product called "Level of Service (LoS) Query" that we can choose to integrate into our application. This functionality enables us to make a real-time query with an address of a customer/end user for the purpose of determining the level of 9-1-1 service available to that customer based on their location. Intrado will return a set of responses (Enhanced, Basic, etc.) that will enable us or our user to determine the level of 9-1-1 service available at that address and take appropriate action.

11. Technical Solution for Nomadic Subscribers:

As a VSP using Telefinity Dash911's E911 for VoIP service, we are able to route VoIP emergency calls from our VoIP network to Telefinity Dash 911's Intrado Network or alternative 3rd party network for delivery to the appropriate Selective Router and then on to the geographically appropriate Public Safety Answering Point (PSAP) via the native 9-1-1 infrastructure. The Services utilized provide a "native" 9-1-1 solution for routing VoIP 9-1-1 calls from both in-region and out-of-region telephone numbers (TNs) to the most geographically appropriate PSAP. The V9-1-1 solution enables full support of nomadic usage of VoIP provided the user updates their address information upon connecting to the Internet at a new location/address. Through the Telefinity Dash 911 interface, the 9-1-1 solution will enable the near real-time provisioning (Geocoding and MSAG Validation) of the newly-provisioned

address and make available (assuming no errors) that particular user's information for delivery to the PSAP within an average of 15 minutes of receipt of the new Registered Location address information.

We recognize the universal desire to remove the user interaction and self-provisioning component of the current 9-1-1 solution. To that end, we understand that Telefinity Dash 911, along with Intrado, are actively working a number of "location determination" technologies.

We believe that this Compliance Letter satisfies the Commission's VoIP 911 Order, but if that is not the case, then Representatives of the Company are available upon request to supplement or clarify any of the statements set forth in this Compliance Letter.

Sincerely,

Martin Toha, President

MT

Safety and Security

FEATURES

- > Accommodates static, mobile users and out-of-area (foreign) telephone numbers
- > Routes VoIP 9-1-1 calls through the existing wireline network
- > Enables ANI and ALI delivery to the PSAP
- > Includes live 24x7x365 call center failover service
- > Allows VSP to check the 9-1-1 service level for a specific record

BENEFITS

- > Supports VSPs' plans for achieving regulatory compliance
- > Reduces go-to-market costs, time and complexity
- > Addresses subscribers' safety needs without compromising VoIP's features
- > Enables positioning of VoIP as a primary line replacement

Intrado® V9-1-1SM Mobility Service

Comprehensive solution to address essentials of VoIP E9-1-1

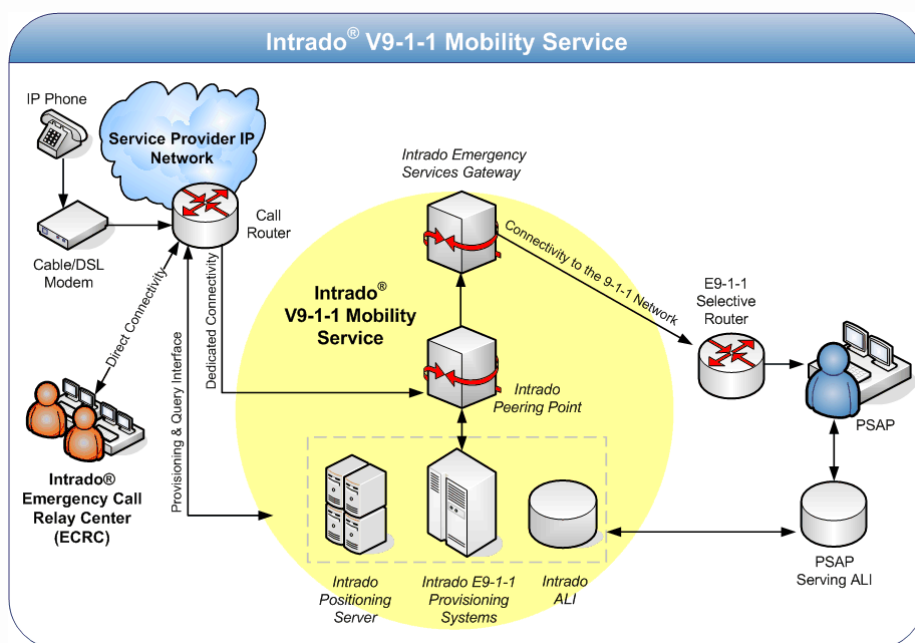

Intrado® V9-1-1SM Mobility Service allows VoIP service providers (VSPs) to offer deployable E9-1-1 services for their VoIP subscribers. Intrado's proven solution helps VSPs comply with regulatory mandates by determining logical routing alternatives based on local network access and connectivity options.

Addresses all components of VoIP E9-1-1 delivery

Successful enhanced 9-1-1 (E9-1-1) call delivery requires VoIP providers to route an Internet telephony 9-1-1 call to the appropriate public safety answering point (PSAP) and to deliver the caller's call back number and location to the 9-1-1 call taker's computer screen. The following information and capabilities are required:

- 1) instructions on how to route the call and the caller's address to the right PSAP;
- 2) a series of "meet me" points to facilitate 9-1-1 network access; and
- 3) local 9-1-1 selective router connectivity to deliver the call "natively."

Intrado is committed to deploying V9-1-1SM Mobility Service nationwide to help VoIP service providers (VSP) meet these three requirements.

E9-1-1 for VoIP is not only a consumer requirement; it is now a regulatory obligation. With V9-1-1 Mobility Service VSPs will be able to seamlessly route their subscribers' 9-1-1 calls into the dedicated Wireline E9-1-1 Network.

Managing E9-1-1 complexities

Access to network elements, local public safety community requirements, dedicated access options and other factors determine how VoIP E9-1-1 can be delivered in any given jurisdiction. This dynamic environment can make it costly and time consuming for VSPs to determine how best to meet regulatory obligations and subscribers' needs.

Intrado V9-1-1 Mobility Service helps address these issues, providing our customers' with a field-tested, comprehensive deployable solution. The service is even able to provide VSPs and their subscribers with a means of checking the 9-1-1 service level by enabling queries on a specific address, for added flexibility in the provisioning process.

Proven 9-1-1 expertise

Because of our proven history of integrating new technologies into the 9-1-1 network, Intrado is uniquely positioned to support VSPs' plans for achieving regulatory compliance. Our customers can focus on core business issues while we focus on the ultimate goal of providing full E9-1-1 for all of their subscribers, whether static, mobile or remote.

About Intrado Safety and Security Solutions

For over two decades Intrado has pioneered the delivery of safety and security solutions, with the 9-1-1 network as the most prominent example.

Intrado helps telecommunications carriers and federal, state and municipal public safety organizations increase efficiency and decrease the time and complexity associated with meeting their safety and security requirements.
